

Access control for safer, smarter, more connected communities

Manage resident, commercial, and tourist access more effectively

You strive to protect your municipal buildings against unwanted intruders and predators, while still ensuring an open, welcoming environment for residents, business people, local government staff, and visitors. Johnson Controls offers a full range of customized access control solutions to help you manage access more securely, including state-of-the-art video elements and visitor and identity management systems.

Customized community configurations

Most importantly, our sizable range of access control readers, doors, gates, and devices means you will get the right technological configuration to meet your municipality's needs and space, whether you're protecting an administrative campus, or secure buildings, such as city halls and local courthouses.

Johnson Controls guarantees worry-free turnkey service and support, from initial assessment and layout to expert installation, locally based maintenance, inspections, and testing.

Remote access

When you add remote access capabilities, your users can administer and control access across multiple buildings and locations from anywhere on any web-enabled device – even during lockdowns. That's critical in emergencies.

Johnson Controls has extensive experience protecting communities of all sizes:

- Complex, high profile sites such as police stations and courthouses
- Single-location buildings, such as city halls and fire stations

Your community security experts

You're assured of worry-free installation, service, and support – start to finish

We have decades of experience customizing solutions to protect communities of all sizes across North America.

We handle it all:

- ☑ Initial layout
