

100 West 10 Street
Chicago Heights, IL 60411

"Maximizing the safety of our students and staff has always been, and always will be, our highest priority. Educational success is easier when the environment is safe."

Bloom Township District Superintendent, Glen Giannetti

About Bloom Township High School District 206

Bloom Township's mission is to provide students with relevant educational experiences that assist in their attainment of competency in all academic areas and the ability to apply these skills to real life endeavors. While working within the multicultural school/community environment, we strive to empower individuals-personally and socially-to achieve their maximum potential using higher order thinking skills that prepare them for the constantly changing challenges of our global society.

exacqVision Hybrid Video Management Systems (VMS) were installed in Bloom Township High School District 206 to maximize the safety of students and staff. Nine 32 input exacqVision Hybrid Systems were installed to replace aging DVR's that were recording 225 analog cameras in two high schools and an administration building. Each school has the exacqVision client software installed on the principals and secretaries PC that have access to only those cameras located in their building. When an incident is reported staff will search digital video recorded to investigate and support their findings. Video can be easily exported to a DVD or USB flash drive and can be shown to students, parents or police as evidence. Video evidence helps Bloom Township Schools reduce repeat offences.

exacq Technologies partner, Pentegra Systems, LLC, an Elmhurst, IL based full service technical solutions supplier of video surveillance technology, installed exacqVision Hybrid Systems in the district's two high schools and administration building.

Software Configuration:

- exacqVision server & client software
- Microsoft XP

Hardware Configuration:

- 9 exacqVision Hybrid Servers with RAID5 storage
- 225 analog cameras
- School buildings are connected with fiber optic cable and Ethernet switches
- Client PC's

Purpose/Benefits of the system:

- Identify behavior or cause of incident
- Identify & apprehend suspects
- Protect assets and reduce vandalism
- Protect students & staff
